49 BESPOKE.COM

VARILITE is the leader in Air-Foam Floatation wheelchair seat cushions and back supports. Air-Foam Floatation combines the best characteristics of air and foam to provide excellent pressure distribution, comfort and stability, all in an ultra-lightweight seat cushion. Air acts like a fluid and displaces under load to provide superior pressure distribution. Foam acts like a spring and compresses under load to provide support and conformation.

VARILITE est un chef de file du système mousse à air. Ces coussins se règlent grâce à une soupape sans pompe. Les réglages sont effectués par l'utilisateur alors qu'il est assis sur le coussin. Selon les modèles, ils sont plus ou moins actifs ou permettent des positionnements plus ou moins complexes.

49 Bespoke Inc. is a privately owned company founded in 2002 as RGK Wheelchairs, Inc. to market and promote BESPOKE (custom Made) RGK Wheelchairs in North America. The company has grown to distribute VARILITE® cushions, backs, PAL Lateral Supports, Belts and Harnesses in Canada along with Batec Mobility, Spinergy wheels and accessories along with the ZX-1, Loop Wheels, CarboLife, Kenda, Frog Legs, Blax, BBraver, Natural Fit, Schwalbe, X-Core, Sun components, Topolino, MBL, Primo and many other products and accessories for ultra-light wheelchairs.

49 Bespoke Inc. est une société privée fondée en 2002 sous le nom de RGK Wheelchairs, Inc. pour commercialiser et promouvoir les fauteuils roulants BESPOKE (sur mesure) RGK Wheelchairs en Amérique du Nord. La société a grandi pour distribuer les produits VARILITE® au Canada ainsi que BATEC Mobility, Spinergy, ZX-1, Benoit Systemes, Loop Wheels, CarboLife, Schwalbe, Shox, XCore, Topolino, Frog Legs et de nombreux autres produits et accessoires pour les fauteuils roulants ultra-légers.

EVOLUTION™

The EVOLUTION™ is ideal for users at high risk of tissue breakdown and in need of symmetric positioning.

Functional areas of the cushion are created by three types of foam : soft foam for the decubitus-sensitive area of the ITs; medium foam for the thigh trough, pelvic bucketing and pre-ischial bar; firm foam for the perimeter and the medial thigh separator.

Le coussin EVOLUTION™ est recommandé pour les utilisateurs présentant un risque important d'escarres, et permet un positionnement symétrique du corps.

Les coussins EVOLUTION™ se présentent en trois zones : une zone de mousse HD sur le contour et au niveau de l'abduction pour favoriser la stabilité du bassin; une zone de mousse medium sous les cuisses; une zone de mousse faible densité située sous les ischions

YOUR SEATING AND POSITIONING RESOURCE CENTER

EVOLUTION WAVE™

The EVOLUTION WAVE™ features an adjustable skin protection cushion with a solid positioning base. Available in three styles.

Positioning supports improve stability, which is important for users with compromised sitting balance or who transfer frequently. Multi-stiffness foam provides support as the user is immersed in the cushion. Medial and lateral supports minimize internal and external lower extremity rotation. Pelvic bucketing and a pre-ischial ridge help maintain pelvic position, and thigh troughs promote a neutral femoral position.

L 'EVOLUTION WAVE™ procure le choix de 3 formats de systèmes d'embases de positionnement rigide « WAVE », afin de prévenir les risques importants d'escarres.

Le système d'embase de positionnement rigide « WAVE » améliore la stabilité, ce qui aide grandement le balancement de l'assise. De plus les supports rigides positionnent efficacement le bassin et les cuisses favorisant le maintien du bon degré d'abduction des membres inférieurs.

The EVOLUTION and MERIDIAN cushions can be used with solid positioning base available in 3 styles :

Les coussins EVOLUTION et MERIDIAN peuvent être utilisés avec une embase de positionnement rigide « WAVE » existant en 3 formats :

Seating Systems : Base De Positionnement - Coussins

MERIDIAN™

The MERIDIAN™ with its front and rear chambers permit independent adjustment of the pelvis and thighs, quickly and easily, while the user is seated. The rear chamber allows maximum immersion of the pelvis for better pressure distribution. The front chamber allows maximum loading of the thighs which reduces pressure on the ITs. The thigh and pelvic chambers form a pre-ischial ridge which prevents the ITs from sliding forward, preventing a posterior pelvic tilt and sacral sitting.

Le coussin MERIDIAN™, avec deux chambres à air, est recommandé pour les utilisateurs présentant un risque important d'escarres, et devant être positionné de manière symétrique (recommandé pour les utilisateurs présentant un dysfonctionnement moteur ou neurologique, blessés médullaires, sclérosés, ...). Les deux chambres à air séparées du coussin MERIDIAN™ permettent un positionnement du bassin et des cuisses rapide et facile; limitant de manière effective l'effet de glissement.

The EVOLUTION™ and MERIDIAN™ cushions can be used with solid positioning base available in 3 styles :

Les coussins EVOLUTION™ et MERIDIAN™ peuvent être utilisés avec une embase de positionnement rigide « WAVE » existant en 3 formats :

Seating Systems : Base De Positionnement - Coussins

WAVE™

Les coussins EVOLUTION™ et MERIDIAN™ peuvent être utilisés avec une embase de positionnement rigide « WAVE » existant en 3 formats :

Biseau contour avant WAVE CPW

Les éléments latéraux positionnent les cuisses et empêchent une abduction trop importante. Le support médian détermine l'abduction optimale. Le biseau contour avant WAVE CPW augmente la pression à l'arrière des cuisses, et diminue la pression sous les fessiers.

Embase contour latéral WAVE LPB

Cette embase permet un support rigide, offrant un bon positionnement du bassin et des membres inférieurs. Les éléments latéraux arrière, situés derrière les grands trochanters, donnent une stabilité qui permet un maintien du bassin au centre de l'assise.

Embase contour complet WAVE CPB

Cette embase combine les avantages du contour latéral LPB, avec une excellente stabilité latérale du bassin, et le maintien du bon degré d'abduction des membres inférieurs.

The EVOLUTION™ and MERIDIAN™ cushions can be used with solid positioning base available in 3 styles.:

Contoured Positioning Wedge

Lateral thigh support to prevent thigh abduction.
Medial thigh support to prevent thigh adduction

Lateral Positioning Base

Lateral pelvic support to maintain pelvis in center of seat. Lateral thigh support to prevent thigh abduction.
Solid base of support for postural stability

Contoured Positioning Base

Lateral pelvic support to maintain pelvis in center of seat. Lateral thigh support to prevent thigh abduction.
Medial thigh support to prevent thigh adduction. Solid base of support for postural stability

REFLEX™

The REFLEX™ is the non-adjustable cushion of choice for wheelchair users with a low risk of tissue breakdown. Therapists recommend the REFLEX™ for users who are at moderate risk of skin breakdown. Therapists value the REFLEX™ because the set amount of immersion conforms to user's body, providing comfort and added stability. The REFLEX™ is ideal for nursing homes, hospitals and other clinical environments where an effective, low maintenance skin protection wheelchair cushion is required.

Le coussin REFLEX™ est recommandé pour les utilisateurs présentant un risque modéré d'escarres. Il ne nécessite aucun ajustement, fournissant automatiquement confort, stabilité, et une excellente répartition des pressions grâce à un système unique de valve à ajustement automatique de l'immersion. Le coussin REFLEX™ est extrêmement léger et facile d'utilisation, le rendant idéal pour les environnements hospitaliers, ou hospitalisations à domicile.

STRATUS™

The STRATUS™ is ideal for users at moderate to low risk of tissue break down and with mild positioning needs. Therapist recommend the STRATUS™ for individuals who need an ultralight cushion to reduce energy expenditure and preserve joint integrity as they self-propel. Users value the Stratus' low weight, slim profile, and comfort.

Le coussin STRATUS™ est recommandé pour les utilisateurs présentant un risque modéré à faible d'escarres, et souhaitant un coussin ultra léger. Sa stabilité, son confort et sa simplicité ont fait du STRATUS™ un coussin extrêmement polyvalent et efficace. Le coussin STRATUS™ offre une grande stabilité : il minimise les effets de rotation de bassin, facilite les transferts, et maintien le bassin en position neutre.

SOLO™

The SOLO was Varilite's first cushion to combine air-foam flotation with multi-stiffness foam. It has been designed for wheelchair users with a risk of tissue breakdown and moderate positioning needs - making it ideal for individuals with paraplegia, orthopaedic and circulatory issues, as well as children and older wheelchair users.

Le Solo est le premier coussin Varilite unissant air et mousse multi-densité. Il a été spécialement conçu pour les utilisateurs à risque d'escarres modéré à haut, et nécessitant un maintien modéré du positionnement. Idéal pour les gens paraplégique, avec des difficultés orthopédiques et circulatoires ou encore pour les enfants et les aînés.

Seating Systems : Base De Positionnement - Coussins

ZOID™

The Zoid™ is the low-profile cushion of choice for active wheelchair users at moderate risk of tissue breakdown. Therapists recommend the Zoid for individuals who need a low profile, tapered cushion without a medial thigh separator.

Le coussin ZOID est recommandé pour les utilisateurs actifs, présentant un risque modéré d'escarres. Son épaisseur (seulement 6cm), son faible poids, et l'absence de zone d'abduction, le rendent idéal pour les personnes actives.

The ZOID™ Cushion with PSV
available until end of stock.

Seating Systems : Base De Positionnement - Coussins

PRO-FORM NX™

A modifiable contoured base, superior pressure distribution, asymmetric positioning options, comfort, and simplicity make the ProForm NX™ an ideal off-the shelf solution when a customizable wheelchair cushion is needed.

Une embase contour personnalisable, une répartition des pressions de qualité supérieure, et un grand confort, définissent le coussin PROFORM NX™. L'élément gonflable situé à l'arrière permet une excellente immersion des ischiens. Une version à double chambre à air peut vous permettre de corriger une obliquité de bassin très facilement.

JUNIOR

Pediatric Seating & Positioning System

The VARILITE JUNIOR line features a full-range of size-appropriate seating and positioning items to support children in their mobility device, allowing them to go where their imagination takes them. By exploring their world, children can gain confidence, increased peer interaction and independence. And VARILITE JUNIOR seating systems are there to support them along the way.

Nos sièges de positionnement JUNIOR vous permettent de combiner différentes solutions de dossiers et de coussins d'assises, adaptées pour des largeurs de bassin à partir de 25 cm.

VARILITE JUNIOR Cushion

The JUNIOR Seat Cushion provides a comfortable, stable foundation for exploration and adventure. Moderate skin protection and positioning is achieved using VARILITE air-foam floatation technology and a soft tailorder cover.

Multi-stiffness foam and a non-intrusive medial thigh separator promotes immersion, stability and positioning.

Water resistant, washable covers and a waterproof inner cushion let kids be kids.

Quick adjustments can be made using the self-inflating valve.

VARILITE JUNIOR Back Support

The JUNIOR Seat Cushion provides a comfortable, stable foundation for exploration and adventure. Moderate skin protection and positioning is achieved using VARILITE air-foam floatation technology and a soft tailorder cover.

Compact, minimal design directs focus to the child, not the equipment.

Simple adjustments allow the back system to grow with your child.

Lightweight air-foam construction coupled with lightweight aluminum allows your child to manually propel with ease.

Simple operation means less time fussing with hardware and more time on the go.

Back Supports : Base De Positionnement - Dossiers

ICON™

Built with the user, caregiver and technician in mind, the ICON™ Back System provides the best solution for those who demand fast installation, adjustment versatility, and simple operation. The ICON™ Back System offers a variety of back types and sizes, each with innovative VariLock hardware, plus a VARILITE air-foam floatation cushion for superior comfort.

Le dossier ICON™ vous apporte un excellent maintien du tronc. Sa dossière en forme ou enveloppante procure un confort augmenté grâce à son système combiné air / mousse. Le dossier ICON™ existe en 4 versions : actif (low), standard (Mid), haut (Tall) et enveloppant (Deep).

Back Supports : Base De Positionnement - Dossiers

EVOLUTION BACK™

Effective postural support, adjustability, comfort and simplicity have made the EVOLUTION BACK™ a favorite of seating specialists. It handles third-party secondary supports with ease and works with the VARILITE PAL™ to provide an elegant, low-profile, integrated back and swing-away lateral support system.

Le dossier EVOLUTION BACK™ est un dossier rigide utilisant une fixation 4 point à défontage rapide. Le dossier EVOLUTION BACK™ existe en 3 versions : standard (Reg), haut (Tall) et enveloppant (Deep).

Back Supports : Base De Positionnement - Dossiers
