

What's New at KI

"Welcome to the New Face of Ki Mobility", is the first thing you see on the new web site! And then we see a multitude of new product and upgrades now available

from the Stevens Point, WI manufacturer.

ROGUE IS CRASH TESTED! Introducing a clean, aesthetic transit tie-down for the Rogue that passes WC-19. Integrated into the frame, the simple, curved front mounts provide safe attachment points while maintaining the sharp look you want from a chair in this class. Why

Little Wave Growth Kit

is growing...

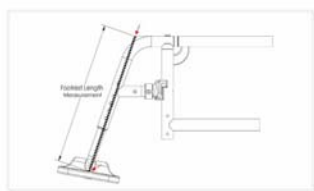

settle for heavy bolt on brackets. Resist Conformity, Go Rogue!

Due to popular request Ki Mobility is now including **"Everything"** you need to grow your Little Wave in

with the XP version. In addition to what was already included we have added in replacement upholstery and footplates at no additional charge to you. Imagine a chair that grows with you ... **For FREE!**

Ki Mobility's measurement works on rigid and swing away frames and results in a better fit for the end user. The measurement is made by measuring from the seat plane straight down the hanger to where the footplate meets the down tube.

Seat to Footrest Measurement

TIGA

RGK's recent new product launch ended up with name issue conflicts so it was relaunched as the TIGA. RGK is marking their 25th Anniversary with the introduction of a number of new products including the TIGA which is available in both an open frame and box frame in 7000 series aluminum. This product is not funded through approved product listings as yet in Canada, but the Hi-Lite and Maxima are available in Canada as ultra light open and box frames respectively.

The TIGA Standard features include the following:

- ✓ Bespoke 7020 aluminum frame with a choice of colour accents (new to RGK)
- ✓ Adjustable height or integrated footrest
- ✓ Sun Fusion, sizes available: 22, 24, 25, 26"
- ✓ Aluminum centre castor wheels
- ✓ Adjustable or integrated camber bar
- ✓ Scissor or push to lock brakes
- ✓ Strap adjustable seat sling, Strap adjustable "Airtech" backrest upholstery and neoprene front frame protectors (new to RGK)
- ✓ Tool Kit Supplied

Optional Extra's include, Anti-tip options, Folding backrest, Ergonomic seating, Side guard and arm rest options, Wheel, push rim, and castor upgrades

TIGA combines the bespoke and personal values, which has defined RGK, with added technology, flair and style.

KENDA Rugby Tires

After three years of development, KENDA is pleased to announce that their new tire for the sport of Rugby in particular will be available in January 2014.

It is named "Kontester" and labeled as K1098A and has the following properties:

1. A side wall thickness of 1.55 mm;
2. Motorcycle construction material giving it a stronger rating than Iron Cloak!
3. Excellent in grip and traction controls.

4. Low profile of 23 mm section width.

5. Dual rubber compounds for longer wear life.

6. Available in Red, Blue, and Black Non-Marking material in sizes 24x1(23-540), 25x1(23-559), 26x1(23-590).

7. If it is good for Rugby it should be excellent for daily use as well; another sport development that makes an impact for everyone in daily use also.

Motion - Permobil

TiLite announced several new US-based sales representation agreements that will become effective December 1, 2013. These new sales representation agreements expand upon TiLite's existing sales partnerships with Permobil, Roho, and Target Medical.

Permobil will represent TiLite in Florida and Puerto Rico, expanding on their existing relationship in Canada. Roho will represent TiLite in Illinois and in most of Wisconsin, expanding on their Michigan relationship. Target Medical will represent TiLite in Tennessee and Mississippi, expanding on the current relationships in Ohio, Indiana, Kentucky, Pennsylvania, and West Virginia.

"We are excited to extend our partnerships with these top players in our industry. Each has proven their dedication to TiLite's vision that what matters most is the outstanding wheelchair experience we deliver to the people we serve. Permobil, Roho, and Target Medical will

now play larger roles in delivering the most advanced and best performing manual mobility product line in the world," said TiLite CEO David Lippes.

TiLite hopes that their current representatives at MSL Associates will continue to show a high level of professionalism until the end of their agreements November 30, 2013.

This represents a big change in Canada since Motion Specialties has had exclusivity on marketing and promoting that product line for years. It will be interesting to see which dealers pick up the line now after having been shut out for years; will it now become a good product or will they continue to say, great material, but conventional design so they are not able to take advantage of the great properties of titanium!

Typical titanium grade and physical properties in annealed condition					
Titanium Grade	Tensile strength min		Yield strength min		Elongation rate min, %
	ksi	Mpa	ksi	Mpa	
Grade 1	35	240	20	138	24
Grade 2	50	345	40	275	20
Grade 3	65	450	55	380	18
Grade 4	80	550	70	483	15
Grd 5 (6Al-4V)	130	895	120	828	10
Grd 7	50	345	40	275	20
Grd 9 (3Al-2.5V)	90	620	70	483	15
Grd 12	70	483	50	345	18
Grd 23 (6Al-4V)	120	828	110	759	10
